Thermometer Record.—The following shows the range of the temperature as observed at Silvey's Drug Store, corner opposite Post Office:

WEDNESDAY.

5 A. M. 15. 10 P. M. 75.

SET FOR FRIDAY.—The Forbes case is set for trial in the County Court on Friday.

Union Camp Meeting.—The Union Camp Meeting at Mountaineer closed last night.

The River.—The marks at the wharf at dark last evening indicated four feet nine inches of water in the channel.

Police Court.—A solitary case before the Police Court yesterday morning: James Barr, disorderly, \$15 and costs.

PERSONAL.—Dr. R. W. Hazlett was called suddenly away from the city, yesterday, to Washington, Pa., owing to the sickness of a near relative in that place.

ADMINISTRATOR APPOINTED.—In the County Court yesterday, Pratz Brandt was appointed Administrator upon the estate of Barbara Brandt, deceased. Bond \$3,000.

MUNICIPAL COURT.—The Municipal Court met yesterday morning, and after signing the orders and docket, adjourned for "Court in course"—otherwise until next term.

THE CHOLERA.—There were two cases of cholera reported yesterday, Washington, of the Eighth ward, and Mrs. Wining of the Sixth ward. Both will very likely prove fatal.

FOR GAMBLING.—Lee Harris, against whom the grand jury yesterday found an indictment for running a lotto bank, was arrested last evening by Deputy Sheriff Kennedy. Harris gave security for his appearance to-day.

G. A. R.—There is to be a special meeting of the Grand Army this evening at their hall on Main street. The Department Commander, Colonel R. B. Heath, will be present, and it is hoped that every member may be in attendance.

INTEREST RECEIVED.—The amount of interest received by the city from the Merchants National Bank, on deposits for the month of August, was \$105. The amount at present on deposit to the credit of the city is about \$38,000.

ACQUITTED.—Geo. K. Mallory, the engineer who was arrested for manslaughter in causing the death of engineer Henry H. Hicks, had a hearing, yesterday, before the justice at Mountaineer, who issued the warrant, and was acquitted.

FINES AND FEES.—The amount of fines and lock-up fees collected by the clerk of the Police Court during the month of August was \$38.40. Of course the amount shown was largely in excess of that amount, as many take their out in exercise on the chain-gang.

BEFORE EQ. COURT.—John O'Neal was taken before the above justice yesterday, charged with disorderly conduct. He was placed under bonds in the sum of \$100 for good behavior for one year. Fritz Roever was taken before the same justice on a similar charge. Being unable to give security he was sent to jail.

KING WILLIAM.—King William arrived in New York a day or two since, coming by the Atlantic cable, for the purpose of taking a "flying" visit back to the "Gracie" balloon. The managers of the balloon to be given on the Island on Saturday heard of King William's arrival, and gave him an invitation to be present, and King William accepted, and will certainly be there Saturday.

LATENT BOXES.—A large number of the street letter-boxes were put in position yesterday. They were objects of great attraction, and many of them were surrounded by a small crowd for hours after being put up. Many people, who haven't probably written a letter for years, if ever, wrote letters just to have the pleasure of putting them in the box, and thereby make themselves the observed of all observers.

WE HEARD IT GENERALLY remarked yesterday that the boxes were placed too high on the posts, as a child of less than twelve or thirteen cannot reach them to put a letter in.

A HALF HOUR IN THE POST OFFICE.

There is no place in town where a half hour can be so profitably spent in the study of character as at the Post Office. We have often sat inside the windows and listened to the conversations going on between the clerks and those who call for letters or other information about the mails, &c. For the benefit of those who are in the habit of annoying the clerks, we will give a few brief conversations.

Enter neatly dressed lady who calls out through the window, "Now I'm sure there's a letter to-day." Clerk says, "Now how do you know when I have not looked those letters over so often to-day?" "But I know and I do for I have been looking for a letter for weeks and weeks and I know it's been written and mailed and is in your box there now if you don't look and if you don't look I'll call at once on the Post Master, and have you turned out that I will there." All this was said without a pause, and so rapidly that one could hardly understand it. Before the last word was out, contrary to the threat to see the Post Master, Miss Spitz Piro was off down the steps. But she was back the next day, and for many succeeding days, and always got off about the same speech—but never got a letter.

Here comes a sour, sour looking gentleman, who looks as though he'd fallen into a solution of alum in his younger days, and his countenance had never quite recovered from the effects of it. He wants a letter, but it hasn't come yet. Then he wants to know when the Pittsburgh mail gets in. The clerk tells him "at 11:55." "I know better," replies alum countenance, "For I got a letter from there a half hour before that the other day." "Very well, sir," replies the clerk, "If you know there is no need of my telling you." "But I don't know, and I'd like to know what you're there for if it ain't to give information. I want to know when the Pittsburgh mail gets in." "I told you 11:55." "And" quoth the alum countenance gentleman, "I know better." And then the clerk walks off to wait upon a gentleman easier pleased, and leaves him to growl through the window, or growl as he pleases.

Next comes a lady who wants a stamp. She purchases it, gets her change, and then asks the clerk if he'll be so very kind as to stick it on; but in the act of handing it to the clerk it falls on the stones outside the window, and the lady can't pick it up with her gloves on, and she wants to know if the clerk will be so very kind as to come around and pick it up for her. Of course he goes.

Next comes a slimmer, miss of about sixteen, who slides up to the window and then slides off again, and then she giggles and slides up again, and finally, with a giggle, wants to know "if there is a letter from Ferdinand Jones to Nancy Nipper?" The clerk answers that there is none from any one for Nancy Nipper; and then Nancy giggles, and wants to know when it will come.

Next comes a precise man of business who "wishes to know if a letter left San Francisco on Monday morning at 25 minutes past 7, when it would arrive in Wheeling?" The clerk ascertains as near as he can and says "Thursday noon." And then the business man commences to cuss the Department in general and the Wheeling office in particular, as his letter left San Francisco at that time and arrived in Wheeling Friday morning.

Next comes a woman who asks if there is "a letter for Eliza Jane Robinson?" The clerk says "No, madam," and then comes and tells us confidentially that Eliza Jane has been coming every day, some days twice, for five years, and never got a letter yet. "And," adds the clerk, "if one were to come I'd be afraid to give it to her, for she knows there is no person in the world who would write to her, and she'd think I was playing a joke on her, and would likely spit in my face."

COUNTY COURT.—Much of the time of the above court was occupied yesterday in calling the docket and setting cases for trial.

In the case of Geo. P. Steinbeck vs. Frances and W. H. Stevenson judgment was given for the amount claimed, \$130.10. In the case of T. Hughes vs. Eliza Mitchell a motion for a new trial was argued; option reserved.

The grand jury found the following indictments: Ellen Shanley, (5 cases) selling liquor without license; James Wolf, petit larceny; Fred Shipley, selling liquor on Sunday; Aug. Wiedebuch, (2 cases) selling liquor on Sunday; W. C. Connelly, R. C. Adams and John Sullivan, unlawful gaming; Christian Baker, cruelty to animals; Lee Harris, keeping a gambling house.

MEETING OF COURTS.—As it is often a matter of annoyance to find out when the different Courts commence their sessions in this city, we have prepared the following, which our readers would do well to have for reference:

Supreme Court of Appeals—First Wednesday in June.

Circuit Court—Second Tuesday in April and October.

County Court—First Monday in every month except July and August; September, January, March and May being jury terms.

Municipal Court—Third Monday in every month, except April and October.

RECOGNIZANCE.—FORGOTTEN.—Isaac Wolf, who was arrested sometime since for stealing lumber and gave bail for Court, did not appear yesterday, and his recognizance was declared forfeited. After the grand jury found an indictment against him a capias was issued and he was arrested and locked up.

EXCURSION TO OHIO.—The excursion on the Scioto to Cresap Grove to-day promises to be one of the enjoyable trips of the season, and, should the weather prove fair, many will avail themselves of the trip to have a day of pleasure.

LOST.—The Market Boy blew out a mad valve Tuesday last and had to lay up. It was repaired and she went to Belair this morning and returned yesterday morning, when she was again compelled to quit business for further repairs.

THE PHOTOGRAPHS made at Robinson's Gallery give satisfaction. Try them.

THE GREATEST bargains in all wool Flannels, Jeans and Cambrics, are to be had at Robinson's.

PARAGRAPHS your pictures by having them framed at Robinson's Gallery.

Further Testimonials to the Excellence of the Centripetal Power Machines.

Messrs. Smith & Co., request of as the publication of the following letters, testifying to the efficiency of the Centripetal Power Machines, from gentlemen whose opinions are of undoubted weight and authority.

"The first is a letter from Charles Carr, proprietor of the Phoenix Iron Works, Trenton, N. J., to Mr. Smith of Messrs. Smith & Co., in answer to enquires respecting the machines built by him. Mr. Carr purchased of Messrs. Smith & Co. that section of New Jersey for the Centripetal Power Machines."

"THURSDAY, August 10th, '73."

"FRIEND RANKIN.—Your letter is received and I am happy to inform you that the machines are working beyond my expectations. We have not sold a machine but what has given entire satisfaction, and some of the parties that have bought would not take four times their cost could they not replace them. It is going to make a revolution in the mode of applying power in this section of the country. 'Very truly yours,'

"CHARLES CARR."

The next is an extract from a letter from J. Howard Murray, Esq., Superintendent of Trenton Vase and Works, manufacturers of Centripetal Machines:

"The machines are all doing more than you ever represented them to be to me. It would do your eyes good to see the machines that we build work. I have orders ahead from parties in New Jersey, Pennsylvania and Delaware. I will have your patterns gathered together and send them with list."

The next is from Col. HUBBARD, of this city, well known as the proprietor of a saw and planing mill, a gentleman who has had much experience with machinery.

"Messrs. Smith & Co.:

"GENTLEMEN.—After a careful examination of your method of applying power (as in your Centripetal Machine) I have no hesitancy in saying it is the most economical I have ever seen."

"Very respectfully, &c."

"H. B. HUBBARD."

Opinions of Hon. Edmund Burke, ex-Commissioner of Patents:

"The driving mechanism is new. It is simple in its construction, very efficient in its action, and in its combinations, and greatly economizes the power required to operate machinery."

From Professor Morris, Professor of Mechanics, Cornell University:

"At the exhibition of your Centripetal Motive Power on the afternoon of February 15th I was not only gratified and surprised at its working, but particularly so by its application to threshing and sawing, and this afternoon's exhibition satisfied me more than ever."

The severe test to which I put the machine in feeding it rapidly satisfied me fully. I found the straw unbroken, straight, ready to be rebound, and perfectly free from grain. The object I had in feeding so rapidly was to note what effect it would have on the Power. I found it very slight indeed, and the momentum was fully regained in an instant."

From Robert Cartwright, Esq., Scientific Engineer. Mr. Cartwright is considered one of the best authorities on machinery in this country, being a scientific engineer, and for a long time a member of the oldest firm in the manufacture of machinery in the State of New York. Mr. Cartwright was employed by the government during the war to build its iron-clad war steamers, which he did successfully, and was also the projector and builder of the bridges on the Union Pacific Railroad.

"Your Centripetal power economizes power that in other cases is wasted. I consider the best that has been brought to my notice in an experience of twenty years as mechanic. The combination of the various machines to be driven by the same power, is such that its possession is with the least expenditure of money, and is comparatively trifling expense, and most ultimately render it valuable to them. In fact, it approaches the nearest to a universal machine of any I ever saw."

From Prof. J. M. Green, a distinguished mechanician and one of the Judges of the recent implement trial at Utica, N. Y.:

"The pressure of the two driving wheels surfaces being applied in opposite directions and with equal tension upon the belt, the motion is transmitted to it unimpeded by friction, except what is due to its own weight. I believe the machine to be one of the most valuable inventions to the list of agricultural machinery that has yet been made."

From Wm. H. Goodspeed, Esq., ship builder, and President of the Bank of New England:

"It is now more than a year since I have been using the saw machines that I had of you; and after so thorough a trial I am pleased to say that it gives me perfect satisfaction. It has cost nothing at all for repairs, and it is as good as when I commenced using it. It would be economy to have two crews rather than one to much by hand as heretofore."

From Practical Farmers:

"We certify that during the past year we have reaped on the farm known as the Stowell farm in the town of Ithaca, that over 25 acres of tall rye was raised on said farm last year of which we were intending to thresh by hand, for the purpose of making the straw for stock. That one of your machines threshed all of said rye with a one-horse power—that we (both of us) had all we could do to bind the straw as fast as it threshed, keeping two men busy to unbind and feed it. The straw was threshed clean and the condition of the grain perfect. On one occasion we threshed over a hundred and thirty bundles in seven minutes and thirteen seconds, in the presence of Wesley Hooker, E. K. Johnson and others; again we threshed fifty bundles in three minutes and forty-five seconds, and one of the last runs we threshed six hundred and seventy-five bundles in one hour and a half. That one of your machines threshed all of said rye with a one-horse power—that we (both of us) had all we could do to bind the straw as fast as it threshed, keeping two men busy to unbind and feed it. The straw was threshed clean and the condition of the grain perfect. On one occasion we threshed over a hundred and thirty bundles in seven minutes and thirteen seconds, in the presence of Wesley Hooker, E. K. Johnson and others; again we threshed fifty bundles in three minutes and forty-five seconds, and one of the last runs we threshed six hundred and seventy-five bundles in one hour and a half. That one of your machines threshed all of said rye with a one-horse power—that we (both of us) had all we could do to bind the straw as fast as it threshed, keeping two men busy to unbind and feed it. The straw was threshed clean and the condition of the grain perfect. On one occasion we threshed over a hundred and thirty bundles in seven minutes and thirteen seconds, in the presence of Wesley Hooker, E. K. Johnson and others; again we threshed fifty bundles in three minutes and forty-five seconds, and one of the last runs we threshed six hundred and seventy-five bundles in one hour and a half. On one occasion we threshed over a hundred and thirty bundles in seven minutes and thirteen seconds, in the presence of Wesley Hooker, E. K. Johnson and others; again we threshed fifty bundles in three minutes and forty-five seconds, and one of the last runs we threshed six hundred and seventy-five bundles in one hour and a half. That one of your machines threshed all of said rye with a one-horse power—that we (both of us) had all we could do to bind the straw as fast as it threshed, keeping two men busy to unbind and feed it. The straw was threshed clean and the condition of the grain perfect. On one occasion we threshed over a hundred and thirty bundles in seven minutes and thirteen seconds, in the presence of Wesley Hooker, E. K.
